## Making a Difference

Our faculty members and students are turning one of Peru's mega-slums into a greener, healthier place. **Joe Zunt** (GH, Epi), **Susan Bolton** (GH) and **Ben Spencer** (GH) are leading plans to

improve the lives of thousands of people in the district of Puente Piedra, near Lima. The project began in 2007. **A recent effort** - helped by eight students on a month-long exploration seminar and by dozens of community members - created a park with walkways, trees and shrubs on what was once a sandy dune. The team also designed and built an irrigation system using recycled water. In the past, they have tested students for hearing, eyesight and asthma. Future plans include building a new health clinic and better classrooms.

## Around the Water Cooler

**Cathy Laurie** (Biostat) and her sister, **Cecelia Laurie** (Biostat), worked together for the first time after years in their respective fields of genetics and mathematics. They were co-first authors of a recently [published paper](#) in *Nature Genetics* that said chromosomal abnormalities increased with age and were linked to a greater
