Making a Difference

SPH students are shining a light on the lack of health insurance options for students enrolled at the UW. A recent study conducted by MPH students in HSERV 590 (Public Health Leadership, Planning and Advocacy Skills),

with support from Hall Health, showed that 6.6 percent of the 3,284 students surveyed reported not having health insurance or not knowing if they did. The most common reason for lack of coverage? Students can't afford it. **Noelia Flores**, **Sharon Hwee**, **Darragh Kerr** and **Bridget Whelan** (all HServ) [hope their findings](#) will motivate UW administration to design a University-wide student health insurance plan. "At the very least, they need to extend health insurance to undocumented immigrant students because they have no route of getting health insurance at all," Kerr said.

Around the Water Cooler

The UW's Population Health Initiative seeks applications from faculty members for [population health pilot research grants](#) of up to \$50,000 each. Project ideas should address at least one of the [UW's grand challenges](#). Applications are due July 28.

Construction on the new population health building is set to begin in February 2018. Seven to eight stories will house office space and common areas such as classrooms, lounges, bike storage and possibly a childcare facility. [See here](#) for building updates.

Ali Rowhani-Rahbar and **Fred Rivara** (both Epi) led an SER panel on [cutting-edge gun violence research](#), featuring experts from academic institutions such as Boston University and the University of Pennsylvania.

Betty Bekemeier's (HServ) career path has taken her from teaching nursing in remote areas of Papua New Guinea to directing the School's Northwest Center for Public Health Practice. She discusses the future of public health practice in [a recent Close Up](#).

MPH student **Gabriel Cortez** (COPHP) [presented a poster](#) at the 16th Annual Symposium of Native and Indigenous Scholarship at the UW. This year's theme was "Stories of Resistance from Indigenous People."

PhD candidate **Sarah Nelson** (IPHG), also a research scientist in the Department of Biostatistics, recently presented her dissertation work at the 4th annual ELSI (Ethical, Legal and Social Implications) Congress. She also blogs about her research. Check out her piece on [direct-to-consumer genetic tests](#).
