

UNIVERSITY of WASHINGTON

SCHOOL OF PUBLIC HEALTH

Our mission is to solve our greatest public health challenges and co-create health equity with communities in the region and the world. We do this by training visionary public health professionals, advancing research, and working alongside communities to create lasting health solutions.

UW PUBLIC HEALTH RESEARCH MAKES

/ *America Healthier*

Research at the UW School of Public Health makes Washington and America healthier, safer, and more prosperous. By discovering how to prevent disease, illness, and injury, we make productive workforces, healthy people, and safe communities.

PRODUCTIVE WORKFORCES

A healthy workforce is a productive workforce. Our research keeps workforces in Washington and across the country working and supporting food systems, essential services, industries and businesses.

HEALTHY PEOPLE

We partner locally and globally to apply advanced technology and community-driven solutions to solve and prevent health problems for populations of people. The result is more healthy people living better lives.

SAFE COMMUNITIES

Our way of life and safety at home depends on public health research and partnerships that prevent disasters, disease, and violence from harming communities and our national security.

DISCOVER THE STORIES THAT SHAPE PUBLIC HEALTH
