

MASTER OF HEALTH INFORMATICS & HEALTH INFORMATION MANAGEMENT

Information technology is transforming the health care industry, giving providers ready access to electronic health records and other information that can vastly improve health care.

The University of Washington's Master of Health Informatics & Health Information Management program prepares you to step into leadership and technology roles in the development and management of enterprise-level health information systems. Our program offers a unique curriculum that combines leadership development with in-depth training in the rapidly changing field of health IT.

The Master of Health Informatics & Health Information Management program is designed for professionals working in health care settings who want to advance into mid- and senior-level leadership roles in health informatics and health information management. The program also serves IT and business professionals who want to apply their skills to enter a health-related field.

A new cohort of the UW MHIHIM program starts every fall. Applications for the following year open on October 1.

ADMISSION REQUIREMENTS

Bachelor's degree from a regionally accredited college or university in the United States or its equivalent from a foreign institution, preferably in business, information technology, health informatics, health information management, or a health-related field. If you have a degree in a different field, but relevant work experience, you will be considered for admission.

REQUIRED APPLICATION MATERIALS

- UW Graduate School online application
- Unofficial transcripts from each college or university where you earned a degree
- Resume or curriculum vitae
- Written statements
- Professional recommendations
- Proof of English language proficiency if English is not your native language
